

## MoRe is a premier, standards-compliant, Enterprise Content Management (ECM) platform

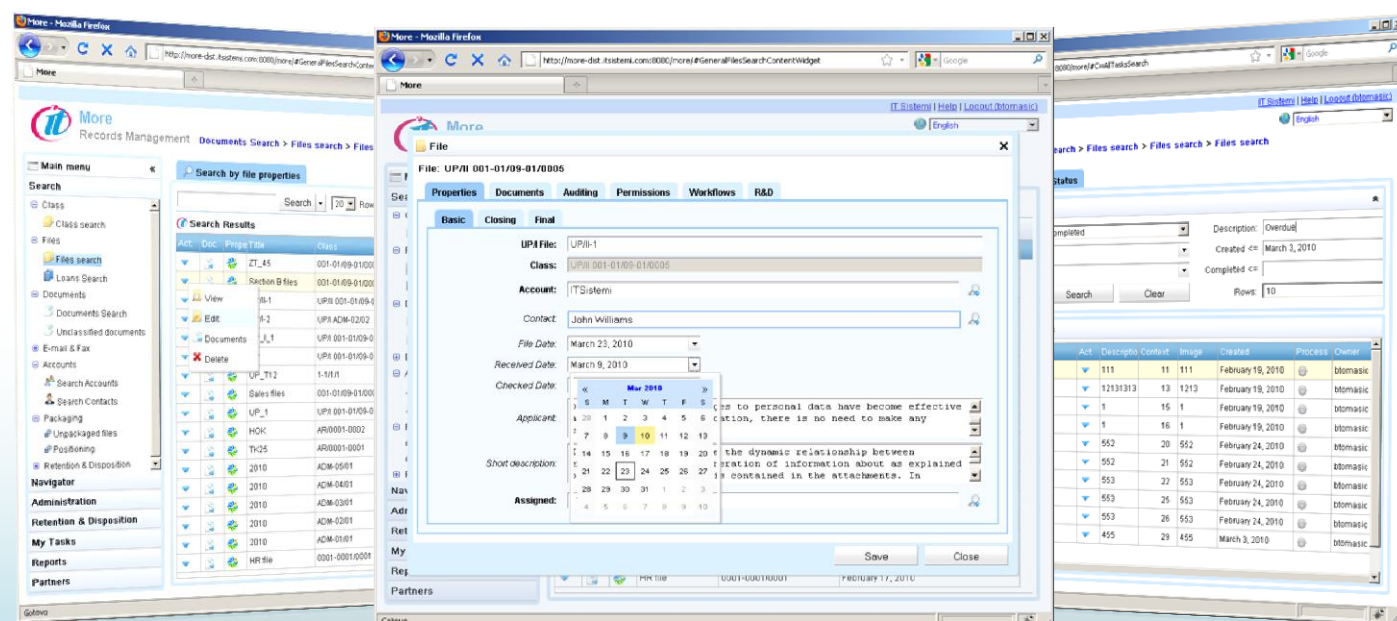

MoRe represents a complete business solution suite that provides a unified platform enabling companies and organizations to securely and effectively manage documents, content and business processes within a single content repository.

Built on a highly scalable technology foundation based on relevant standards and regulations, backed with exceptional application integration, MoRe ensures high levels of scalability, fast return on investment, and customer satisfaction.

### An affordable ECM platform for your daily operations

With Enterprise Resource Planning (ERP) systems, organizations and companies are trying to achieve better organization, higher process transparency, faster execution, and lower costs. But the ability to achieve these goals continues to be elusive, or comes at a high cost.

With MoRe companies and organizations can achieve better organization, lower costs, and process excellence, at an affordable rate. MoRe platform increases productivity - improving the ability to make clear business decisions, eliminate process bottlenecks and in the end of the day help you achieve MoRe.

# SYSTEM REQUIREMENTS

**MoRe** is installed on a central network server and is accessible from anywhere in the world, requiring the end user only to have an internet browser with a valid network connection without any additional hardware or software. Scalable platform which supports a multi-server distributed architecture allows users to install **MoRe** across multiple servers to achieve redundancy and network and load balancing.

## Server

### Operating system

- Windows server 2003 or higher
- Linux (Ubuntu, Suse ...)

### Hardware

- For 50 concurrent or up to 500 casual users: 2x server CPU (or 1xDual-core), 2GB RAM
- For 100 concurrent users or up to 1000 casual users: 4x server CPU (or 2xDual-core), 4GB RAM
- For 200 concurrent users or up to 2000 casual users: 8x server CPU (or 4xDual-core), 8GB RAM

## Client

### Operating system

- Windows XP / Vista / 7
- Linux (Ubuntu, Suse ...)

### Web browser

- Microsoft Internet Explorer 6.0 or higher
- Mozilla Firefox 3.0 or higher
- Google Chrome
