

MoRe – AutoCAD connector

MoRe represents a complete business solution suite that provides a unified platform enabling companies and organizations to securely and effectively manage documents, content and business processes within a single content repository. Built on a highly scalable technology foundation based on relevant standards and regulations, backed with exceptional application integration, **MoRe** ensures high levels of scalability, fast return on investment, and customer satisfaction.

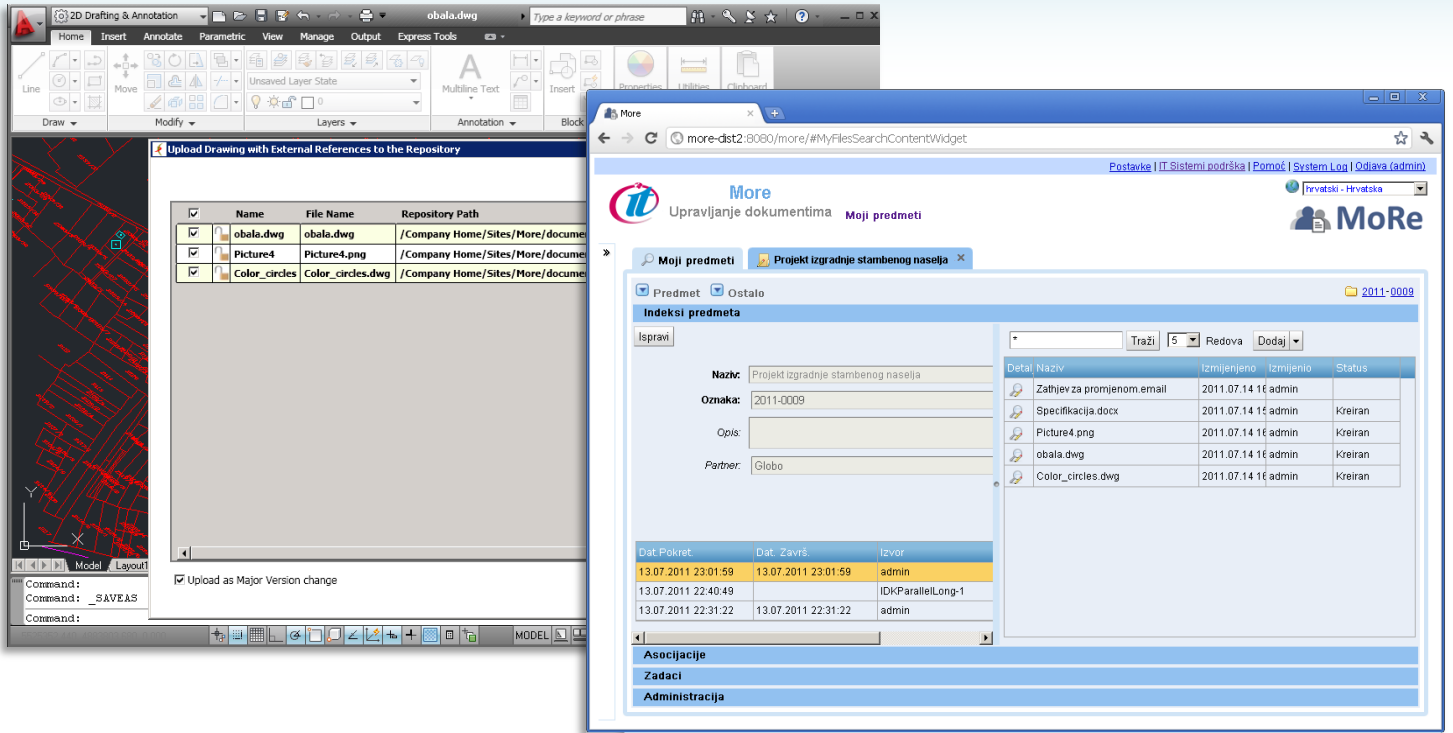

AutoCAD integration

MoRe AutoCAD connector enables AutoCAD users to simply interact with **MoRe** document management system, directly from AutoCAD. This enables AutoCAD users to manage their documents (contracts, quotes, specifications, plans,...) in a simple way.

MoRe document management system enables internal preview of AutoCAD documents, thus eliminating the need to have AutoCAD installed on every PC.

By using **MoRe AutoCAD connector**, AutoCAD users can search and open documents, check-in/check-out the documents and work with metadata. When saving or opening documents in **MoRe**, all the references (XREFS) between dependent files (DWG, DGN, PDF, raster,...) are maintained. As a web-based solution, **MoRe** allows collaboration from any location with Internet access, making work in distributed environments easier.

Simple work with AutoCAD documents

- work with MoRe document management system from the AutoCAD interface:
 - open and save documents
 - check-in/check-out
 - versioning
- work with metadata from AutoCAD

Keeping the references between AutoCAD documents

- keeping references to external AutoCAD documents (XREFS)
- keeping the references to other documents (DGN, PDF, raster,...)

Document preview

- preview of all AutoCAD documents directly in MoRe document management system (in internet browser), eliminating the need for specialized software
- PDF conversion

Document Management

- document approvals
- collaboration
- auditing and versioning
- event based email notifications
- reporting
- email and fax archive

MORE FEATURES

Document & records management

- Create, share and manage records & documents
- Templates (doc, xls, ...)
- Documents preview
- Multiple language support
- Version Control (Check-In/Out)
- Auditing

Predefined modules

- Records management (retention policies and tracking of both digital and paper documents)
- Invoice processing
- Project management
- Quality management
- Physical archive (packaging & positioning)

Print, scan, fax and e-mail to MoRe

- Simple one click features
- Barcode document separation
- Classify e-mails to documents

CRM

- Associate records & documents with partners & contacts

Application integration

- Mule ESB (enterprise service bus) - wide variety of integration possibilities
- Microsoft Office^R
- Alfresco^R full integration
- Kofax^R
- AutoCAD^R

Directory integration

Collaboration through tasks and workflows

- Workflow/business process management
- Task and status tracking
- E-mail alerts and change notifications
- Graphical view of the Workflow process

Customization

- Custom classification scheme
- Custom forms
- Custom search
- Custom reports
- Custom workflows

Security

- Security and user management with users, groups and roles
- Document level security
- Field level security
- Single sign-on through NTLM or Kerberos
- Synchronization of users and groups through LDAP
- HTTP or HTTPS client

Retention & disposition

- Document & record level schedules

Integrated e-mail client

- Create new, respond or forward e-mail
- Digitally sign & unsign e-mail

Fax i Email server integration
